

PRIMARY SCHOOL
PRIVACY INFORMATION for parents, guardians and carers

During the ordinary course of your child's attendance at our school, school staff will collect your child's personal and health information when necessary to educate your child, or to support your child's social and emotional wellbeing or health in the school context. Such information will also be collected when required to fulfil a legal obligation, including duty of care, anti-discrimination law and occupational health and safety law. If that information is not collected, the school may be unable to provide optimal education or support to your child, or fulfil those legal obligations.

For example, health information may be collected through the school nurse, primary welfare officer or wellbeing staff member. If your child is referred to a specific health service at school, such as a Student Support Services officer, the required consent will be obtained. Our school also collects information provided by parents, guardians and carers through the School Entrance Health Questionnaire (SEHQ) and the Early Childhood Intervention Service (ECIS) Transition Form.

Our school may use online tools, such as apps and other software, to collect and manage information about your child. When our school uses these online tools, we take steps to ensure that your child's information is secure. These online tools enable our school to efficiently and effectively manage important information about your child and also to communicate with you. If you have any concerns about the use of these online tools, please contact us.

School staff will only share your child's personal or health information with other staff who need to know to enable the school to educate or support your child, or fulfil a legal obligation.

When our students transfer to another Victorian government school, personal and health information about that student will be transferred to that next school. Transferring this information is in the best interests of our students and assists that next school to provide optimal education and support to students.

In some limited circumstances, information may be disclosed outside of the school (and outside of the Department of Education and Training). The school will seek your consent for such disclosures unless the disclosure is allowed or mandated by law.

Our school values the privacy of every person. When collecting and managing personal and health information, all school staff must comply with Victorian privacy law. For more information about privacy including about how to access personal and health information held by the school about you or your child, see our school's privacy policy:

<https://www.education.vic.gov.au/Pages/schoolsprivacypolicy.aspx>

Throughout this notice, 'staff' includes principals, teachers, Student Support Service officers, youth workers, social workers, nurses and any other allied health practitioners and all other staff at our school. This includes employees, agents and service providers (contractors) of the Department, whether paid or unpaid.

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.4 billion.

There are a number of reasons why the world's population is growing so rapidly. One of the main reasons is that the number of children born to each woman has increased. This is due to a number of factors, including improved medical care, better nutrition, and a higher birth rate.

Another reason why the world's population is growing so rapidly is that the number of people who are surviving to old age has increased. This is due to a number of factors, including improved medical care, better nutrition, and a higher life expectancy.

There are a number of other factors that are contributing to the world's population growth, including a higher birth rate, better nutrition, and a higher life expectancy. These factors are all contributing to a rapid increase in the world's population.

The world's population is growing so rapidly that it is expected to reach 8 billion by the year 2025. This is a significant increase from the 5 billion people who lived in the world in 1987.

The rapid growth of the world's population is a major concern for many people. It is expected to lead to a number of problems, including a shortage of food, a lack of housing, and a higher level of pollution.

There are a number of ways in which the world's population growth can be slowed down. One way is to reduce the birth rate. This can be done by providing better education and health care for women.

Another way to slow down the world's population growth is to improve the nutrition of the world's population. This can be done by providing better food and health care.

There are a number of other ways in which the world's population growth can be slowed down, including providing better education and health care for women, and improving the nutrition of the world's population.
