

## Laptop Information Sheet

Year Levels 7 to 12

To equip students for success in the 21st century and simplify costs for families, all secondary students must have a personal device. Printed textbooks have been replaced with digital content for Years 7 to 10, with most curriculum materials delivered online.

Software packages used by secondary students will include:

Compass	Timetable reports, learning tasks, announcements and notifications
Google Suite	Storing files, producing work. This replaces Microsoft office and allows student work to be accessed from any online device
Gmail	Primary login for Google Suite (above) emailing with teachers
Google Sites	Website developed by teachers to reflect the learning programs, resources and assessment for each subject
Google Classroom	Used by teachers to individualize and differentiate learning with their own students and for students to submit work
Digital textbooks	For Year 7-10 this bundle means students do not need any hardcopy textbooks, and only one login from one publisher*
Edrolo, Mathletics, Stile	Additional learning resources and used by some subjects

\*VCE subjects will continue to use textbooks from different publishers, often giving students a choice.

"Bring Your Own Device" means students bring their own laptop to school. The school provides internet and access to digital resources. Students must use and transport their device safely and store it in their locker, keeping the combination private. **Families are responsible for maintaining the device, including charging it fully at home, as charging at school may not be possible.**

**Mobile phones cannot be used as devices or for any purpose during the school day, following school and Department of Education rules.**

While all devices will be supported, Windows PCs are more compatible. Below are the minimum specifications we recommend.

## Minimum Specifications

Operating System	Windows 11 (laptop) <b>No Linux OS, android tablets or iPads!</b>
Storage	128 GB minimum, Solid State Drive (SSD)
Memory	8 GB minimum
Wifi	Dual band Wi-Fi 6 (802.11ax)

Please think about battery life, screen size, and weight when choosing a device. These factors are important.

### Recommended

Parents can buy a device from any major or specialist retailer, but the school has partnered with JB Hi-Fi to make the process easier. Competitive pricing is offered, but using this service is completely optional.

**JB Hi-Fi:** <https://byod.jbhifi.education/>

Payment plans are available but may require a credit check.

For portal instructions and details, see the attached documents. Families needing support can request a Financial Scholarship application form from the secondary administration building. Requests will be reviewed by the Executive Principal and School Council.

The College ICT Helpdesk is in the Eyre building. Technicians help students connect to the network, set up printing, logins, passwords, and troubleshoot issues.

Bring Your Own Device Overview for Parents

# BYOD is tech selection for parents, made easy

**We've partnered with your children's schools to equip them with the right technology and prepare them for success.**

As a parent, you want your children to have the best technology available for learning. However, affordability and finding the devices that meet their school's specific ICT processes and curriculum requirements can cause headaches.

**That's where our Bring Your Own Device Program (BYOD) can make a world of difference.**

## **Helping students to shine**

JB Hi-Fi Education's BYOD is the easy way to motivate students with education-specific technology that's compatible with their school and designed for the rigours of their student life.

Education pricing means great value. Extended warranty and insurance options facilitate consistency of learning, whether at home or in the classroom.

## **New BYOD portal!**

At JB Hi-Fi Education, we're constantly looking for ways to enhance our technology and services to provide you with the best possible experience.

The new portal incorporates a refreshed look and a mobile responsive design to conveniently shop any device.
